

LPP's Role

- Planning feasibility and policy advice and input to Estate Strategy and Site Masterplan
- Working with the Trust's appointed architects and liaising with LPA and Highway Authority planning and transport officers
- Preparation and submission of planning applications for operational healthcare developments and securing related consents
- Commissioning and coordinating survey work and reports related to specific planning applications and a planning appeal
- Coordinating car parking strategy and travel plan reviews and securing related planning approvals
- Securing planning consent for an emergency helipad with unrestricted hours of use, additional staff, patient and visitor parking, and a signage strategy across the Hospital Campus

Instruction

Planning and travel planning strategy advice

Client

Ipswich Hospital NHS Trust

Project Details

Ipswich Hospital occupies an 18.5 hectare campus and provides acute health services to the population of Ipswich and surrounding area. The NHS Trust has been implementing several projects as part of its development programme, which has required planning consultancy advice and support. An Estate Strategy has been prepared, which has served as a framework to bring forward detailed planning applications such as a Maternity block, Oncology and Haematology unit and large surface car park. An updated masterplan is also being considered.
